

Fire Smarts

ENABLING FIRE PROTECTION KNOWLEDGE

Expert fire protection education and training services.

Your source for comprehensive training on:

- Fire Sprinkler System Design
- Fire Sprinkler Installation
- Hydraulic Calculations
- High Piled Storage
- Seismic Bracing
- Residential Sprinkler Systems
- Inspection and Testing
- Life Safety Code
- NICET Exam Review

Custom Training

We offer custom tailored training solutions to meet your organizations needs. When training a group of six or more people, it is often more cost effective to bring the expert to you. Eliminate costly travel time and expense, and have a Fire Smarts Faculty member provide expert instruction on the fire protection topics and issues most important to you.

Expert Faculty

Our faculty includes internationally recognized industry experts with a proven ability and passion for educating our clients on the proper methods for design and installation of fire protection systems. Learn from industry leading professional engineers, NICET certified technicians, and members of NFPA code and standard technical committees.

Classroom/Online Instruction

From traditional classroom training to virtual online training, we deliver. Utilizing advanced online training tools and software, we create a virtual classroom for you to learn from our faculty without travel delays and expense. Through interactive screen sharing and pen tablet technology you can receive quality instruction right from your own computer.

Bringing the top fire protection experts in the industry to you.

Fire Smarts

ENABLING FIRE PROTECTION KNOWLEDGE

Residential Fire Sprinkler Training Services.

Our faculty includes internationally recognized industry experts with a proven ability and passion for educating our clients on the proper methods for design and installation of fire protection systems. Learn from industry leading professional engineers, NICET certified technicians, and members of NFPA code and standard technical committees.

ASSE 7000 Certification Training

As an ASSE Approved School we provide complete training programs for ASSE 7000 Installer and Inspector Certifications. As the only ANSI Approved professional qualifications standard for residential fire sprinklers, ASSE 7000 provides assurance to the industry that only qualified individuals are installing and inspecting these systems.

Official Training Partner of PHCC

We are the official partner of Plumbing-Heating-Cooling Contractors (PHCC) National Association in providing residential fire sprinkler training to the plumbing industry. Together with PHCC, we are proactively ensuring that plumbing contractors have access to quality training for the proper installation of residential fire sprinkler systems.

Online Resources

We operate the home fire protection resource website ResidentialFireSprinklers.com featuring a frequently updated collection of industry news, educational materials and leading online resources related to residential fire sprinkler systems.

Bringing the top fire protection experts in the industry to you.
